ANNUAL SUBJECT INDEX

Vol. 11 no. 6 1995
Pages 697–698

ADE
co-inertia analysis, proteins 321
Automat
BLAST, comparisons 261
Biological classification
HICLAS, database 237
Biopolymer
SAMSON, primary structure analysis 423
BLAST
Automat, comparisons 261
parallel computers, sequence comparison 3
BULLET
shotgun DNA sequencing, simulation 155
CAIC
comparative data analysis 247
CCINFO-PC
culture collections, worldwide, database 209
Chromosome
aberrations, ionizing radiation, Monte Carlo simulation 389
Codons
usage pattern, phylogeny 167
Comparative data analysis
CAIC 247
Complexity analysis
parametized, computational biology 49
Conformational analysis
nano-kinetics 71
Database
culture collections, worldwide, CCINFO-PC 209
FANS-REF, nucleotide sequences 541
HICLAS, biological classification 237
Kabat, analysis, SUBIM 435
molecular biological object-oriented, incorporation semantic integrity 339
protein, sequence, compression 557
RAMdb, retrieval pattern search algorithm, nucleic acids/protein databanks 273
sequence, compression mechanism 219
transcriptional elements scanning, MATRIX SEARCH 1.0 563
DEFPARAM
automatic alignment of biological objects, n-fold symmetry 553
DIPLOMO
evolutionary analysis 535
DistAlign
relating sequence variability to structure 571
DNA
agarose gel, determination, GelScann (1.0) 187
comparison, clustering, improved tools 603
DNAView, large sequenced regions, visualization 317
estimating population genetics parameters, DnsSP 621
graphical sequence comparisons.MiroPeats 615
partial digestion experiments, analysis, algorithm 229
random walk, gap plots 503
sequence analysis, DNASTAT 449
sequence comparisons, MiroPeats 615
sequence, local alignment tool, *sim2* 147
sequence, unaligned, common motif identification, *E.coli Lrp* regulon 379
shotgun sequencing, simulation, BULLET 155
zinc finger DNA binding protein prediction, neural networks 125
DnaSP
estimating population genetics parameters, sequence data 621
DNASUN
genetic engineering 331
DNAView
DNA, large sequenced regions, visualization 317
Dotplots
X-window, interactive analysis 301
FANS-REF
nucleotide sequences, database 541
Flat files
retrieval tool, archive, *yank*, 45
FORTRAN
genetic variability evolution, small population 469
sequence, DNA evolution, simulation
Fourier transforms
three-dimensional reconstruction helical structures 373
GelScann (1.0)
DNA determination, agarose gel 187
Genetic engineering
DNASUN 331
Genome
comparison, interactive huge, probabilistic algorithm, PAGEC 657
GRAIL II
DNA coding region, sequence error correction 117
Graphics
cytogenetic research, education 463
HICLAS
Database, biological classification 237
HomBond
protein side chain interactions, comparisons 577
Hybridization
filter images, automatic reading 489
Hypertext
JAM, biological documentation 224
taxonomic keys, user interface investigation 19
Interferon
induction, action, regulation, computer system analysis 213
JAM
hypertext, biological documentation 224
Mariculture ponds
water quality management, qualitative ecological model 595
MATRIX SEARCH 1.0
transcriptional elements, scanning, weight matrices database 563
MiroPeats
graphical DNA sequence comparisons 615
MIST
metabolic simulator 201
MitoProt
mitochondrial proteins, study 441
Molecular matching
three-dimensional, flexible pattern in text 59
nano-kinetics 71
three-dimensional, robotics-based technique, automated computer vision 87
Monte Carlo simulation
chromosome, aberrational, ionizing radiation 389
MSEQ
peptides, sequencing, collision-activated decomposition experiments 427
Neural networks
coding region discrimination, eukaryotic genes 497
LGANN, parallel system, local genetic algorithm, proteins, secondary structure prediction 253
parallel, simulator, CM-5 system 309
sequence compositional constraints, detection 29
transcription control signals, analysis 293
zinc finger DNA binding protein, prediction 125
NUCGEN
nucleic acids, sequence dependent structure 281
NUPARM
nucleic acids, sequence dependent structure 281
NUVIEW
nucleic acids, display, interactive manipulation 289
Object-oriented programming
biosciences applications 517
PAGEC
genome comparison algorithm 657
Pascal
DNASTAT, DNA, proteins, sequence analysis 449

© Oxford University Press

PBM
interactive manipulation, small molecules, proteins 141
PdbAlign
relating sequence variability to structure 571
PdbDist
relating sequence variability to structure 571
Peptides
sequencing, collision-activated decomposition experiments 427
Photoperiod length
calculation, algorithm 133
Plant
photosynthesis, dynamics modelling, WIMOVAC 361
PROANAL version 2.0
multiple protein sequence analysis 39
PROFILER
database searching 667
Programs
α-helix region prediction, stochastic rule learning 399
ADE, co-inertia analysis, proteins 321
ALIGNMENT SERVICE, multiple alignment sequence 7
BLAST, Automat, comparisons 261
BLAST, sequence comparison, parallel computers 3
BULLET, shotgun DNA sequencing, simulation 155
CAIC, comparative data analysis 247
co-inertia analysis, ADE 321
DEFPARAM, automatic alignment of biological objects, n-fold symmetry 553
DIPLOMO, evolutionary analysis 535
DistAlign, relating sequence variability to structure 571
DnaSP, estimating population genetics parameters, sequence data 621
DNASUN, genetic engineering 331
eukaryotic, identification, *FunSiteP* 477
exon correspondences, evaluation 509
FORTRAN, genetic variability evolution, small population 469
FORTRAN, sequence, DNA evolution, simulation 111 GRAIL II, sequence, DNA coding region, error correction 117
FunSiteP, promoters, eukaryotic, identification 477
GelScann (1.0), DNA determination, agarose gel 187
HomBond, protein side chain interactions, comparisons 577
interactive manipulation, PBM 141
JAM, biological documentaion 224
MATRIX SEARCH 1.0, transcriptional elements scanning, weight matrices database 563
MiroPeats, graphical DNA sequence comparisons 615
MIST, metabolic simulator 201
mitochondrial, study, MitoProt 441
MitoProt, mitochondrial proteins, study 441
MSEQ, peptides, sequencing, collision-activated decomposition experiments 427
NUPARM, NUCGEN, nucleic acids, sequence dependent structure 281
NUVIEW, nucleic acids, display, interactive manipulation 289
parallel loop search 591
PBM, interactive manipulation, small molecules, proteins 141
PdbAlign, relating sequence variability to structure 571
PdbDist, relating sequence variability to structure 571
PROANAL version 2.0, multiple protein sequence analysis 39
PROFILER, database searching 667
RNA_d2, RNA secondary structure, editing, display 101
SAM, marker map building 645
SAMSON, biopolymer, primary structure analysis 423
secondary structure prediction, multiple alignment analysis, STAMA algorithm 627
sim2, local alignment tool, DNA sequence 147
SUBIM, Kabat database analysis 435
SUBTRACT, subtractive hybridization, modelling 457
TRAMP, transposons, map generation 173
WIMOVAC, plant photosynthesis, dynamics modelling 361
yank, retrieval tool, flat files 45
Proteins
secondary structure prediction, neural networks, parallel system, LGANN,local genetic algorithm 253
secondary structure prediction, SOPMA, improved method 681
sequence databases, compression 557
sequence analysis, DNASTAT 449
sequence, inter-residue dependency representation, probabilistic networks 413
side chain interactions, comparisons, HomBond 577
similarity linkage, representation 159
structure classification, rapid, BioScan parallel computer 675
RAMdb
retrieval pattern search algorithm, nucleic acids/protein databanks 273
RNA_d2
RNA secondary structure, editing, display 101
RNA
secondary structure prediction, parallel computers 685
SAM
marker map building 645
SAMSON
biopolymer, primary structure analysis 423
Sequence
alignment, linear space, variable gap penalties introduction 181
alignment, multiple, ALIGNMENT SERVICE 7
alignment, multiple, iterative algorithms 13
multiple protein, analysis, PROANAL version 2.0 39
alignment, weighting system, algorithm 543
database, compression mechanism 219
DNA coding region, error correction, GRAIL II 117
DNA evolution, simulation, FORTRAN 111
DNA, comparisons, MiroPeats 615
DNA, local alignment tool, *sim2* 147
DNA, proteins, analysis, DNASTAT 449
DNA, unaligned, common motif identification, *E.coli Lrp* regulon 379
genomic, middle-range clustering, algorithm 15
nucleotide analysis, integer arithmetic 567
proteins, inter-residue dependency representation, probabilistic networks 413
proteins, sequence databases compression 557
software development, object-oriented data handler 583
splice site, prediction, algorithm, categorical discriminant analysis 349
sim2
local alignment tool, DNA sequence 147
Stochastic rule learning
α-helix region prediction, proteins 399
SUBIM
Kabat database analysis 435
Subtractive hybridization
modelling, SUBTRACT 457
SUBTRACT
subtractive hybridiziation, modelling 457
TRAMP
transposons, map generation 173
Transposons
map generation, TRAMP 173
WIMOVAC
plant, photosynthesis, dynamics modelling 361
Yank
retrieval tool, flat files 45
